

Road Safety Training Parks (RSTP)

Traffic Training Parks not only work on creating and spreading awareness but also provide 2 wheeler riding training to people, thus making them capable to ride on roads cautiously.

- ▶ The RSTPs are equipped with riding simulators and other state- of-the-art facilities meant to help one understand how to be safe on the roads. Professional instructors conduct road-safety awareness programmes for students from various schools and colleges, staff members of other organisations, and local traffic police.
- ▶ On an average, each RSTP engages with more than a thousand individuals in a month and the goal is for each participant to go out as a responsible road user and an ambassador of road safety.
- ▶ The company has been managing six Road Safety Training Parks in six states.
